

SLIME

Ingredients:

2 2/3 cups Elmer's White School Glue
(you can also use clear glue)

2/3 cup liquid starch

(use Sta-Flo starch, we tried another kind and it did NOT work)

2 cups shaving cream

It's pretty straight-forward, put the ingredients in a big bowl and stir.
The shaving cream makes the slime fluffier.

Also, you can add food coloring to get different colors.
We divided our batch into four bowls and added different colors of food coloring to get different colors of slime.

YOU CAN ALSO ADD GLITTER!

If you make your slime with clear glue it makes it translucent instead of opaque.

Don't let different color slimes touch because they will combine together easily.
